

# My brushing chart

Tips for parents/carers...

Help with brushing for two minutes at least twice a day, especially before going to bed – don't forget to brush the gum line  
 Use fluoride toothpaste (containing at least 1,000ppm – see ingredients)  
 Do not rinse with water after brushing, just spit out

How much toothpaste?

0-3 years old  
just a smear

3+ years old  
a pea-sized blob

## Spark their interest...

Pretend to brush teddy's or doll's teeth

Make up a story e.g. the toothbrush (the good guy) beating the invading germs (the bad guys)

Face opposite each other and brush at the same time, mirroring how you brush

Brush each other's teeth

ROAR like a dinosaur or a tiger (an open mouth will help you to access their teeth)

Try different products, like a milder toothpaste, a fun toothbrush, a 2 minute timer or brushing in front of a mirror

Have a few different colour brushes they can choose from to suit their mood!

Distraction – watching TV or a tablet while you brush their teeth? They can spit out into a tissue or some kitchen roll

Try apps, youtube videos or songs to make brushing fun and engaging

## Be positive...

Brush your teeth at the same time together...

"I like it when we brush our teeth together!"

Give an immediate reward: a bedtime story, watch something on TV or play outside

An independent child? Let them brush first, then you follow up

Take a deep breath and be patient if they are not co-operating

Choose your timings well i.e. avoid overtiredness and stressful times of the day

Try to leave at least 30 minutes after eating or drinking

Develop a routine each time

Give praise for any compliance or achievement... "Well done! Great brushing! Your teeth are **so** clean!!"

Build on each achievement by reminding them of how well they did before

## Tips for brushing young teeth
